

# TAYLER ONDERSMA

## Front End Web Developer

### EDUCATION

#### Grand Circus

Front-End Bootcamp | 2021

- Jack White Memory Game: [GitHub-Link](#) ; [Playable-Link](#)

#### University of Michigan

Bachelor's Degree | May 2017

- Double major in Psychology and Sociology

### PERSONAL PROFILE

I am a recent Grand Circus graduate with certification in front end web development. Before Grand Circus I worked as a child care specialist and developed lasting meaningful relationships with the families while doing self-exploration on my own time. I had already been dabbling with coding and when I was afforded more free time due to the pandemic, I dove deeper into coding, finding I truly enjoyed it and was good at it. My work with children 2 and under has helped me develop a unique level of patience which combined with my empathy for others are unique characteristics that think will help me go far as a developer.

### WORK EXPERIENCE

#### Self-Employed

Child Development Specialist/Nanny | Nov 2017 - Jan 2021

- Helped children reach developmental milestones through:
  - educational play and reading
  - One-on-one tutoring and attending classes together like "Fun at One" through the First Steps program offered by AAPs
  - enriching outings (i.e. museums, parks, etc.)
  - Worked with families to develop individualized plans to best meet the needs of each unique child

#### University of Michigan, Brain and Cognition Lab

Lab Manager | June 2016 - July 2017

- Oversaw operations of the lab including but were not limited to:
  - daily check-ins on 3 or more ongoing research projects and with 5 plus graduate students
  - Placing orders for various lab supplies and managing \$100s in lab funds
  - Conducting research assistant interviews and trained more than ten new research assistants
  - Preparing for periodic reviews to ensure/protect the welfare of human subjects

#### Research Assistant | June 2015 - June 2016

- Recruited/scheduled hundreds of participants via email and phone communication
- Administered hundreds of cognitive and diagnostic tests then recorded, scored, and interpreted data into a database containing thousands participants
- Paid participants for their participation with lab funds
